## Health Portal Solutions Job Description

### SQL Database Developer

Health Portal Solutions, located in San Antonio Texas, is a successful SaaS company, who is seeking an **SQL Database Developer** to support a mature customer base and develop solutions for the Insurance and Healthcare Industry. This is a hands-on position where the Developer works with a staff programmer and executes multiple complex, highly visible projects across the product lines.

### Responsibilities

- Design, develop, and support multiple customer sites having SQL database services integrated with secure Web Services and Mobile APPS
- Implement HIPAA and similar compliance requirements, work with HIPAA Officer and maintain independent certifications and audits
- Mature SQL Design and architecture, programming TSQL, and Stored Procedures for Universal DB Design
- SSRS Reports integrated with security rules and web applications
- Database programming of Product Security, User Access Rules, and HIPAA Compliance
- Develop SSIS Data Import and Export Solutions and CLR programming in the SQL Database
- Design SQL for scale and performance, tuning, and optimization
- Write Design Documents for internal teams, business solutions, and external customer support
- Collaborate and Integrate software with hosting providers and trading partners
- Perform Quality Assurance Testing and Code Reviews
- Consistently produce release updates for customer base without problems or regression failure. Maintain Standards for Security Requirements, Software, Business Processes, and overall Quality of work.
- Leadership: Work with business analyst, QA teams and IT staff in a manner that will ensure deliverables are achieved in accordance with commitments made
- Represent Company in the sales and implementation process and actively manage customer relationships and expectations from the close of the sale to “going live”

### Education/Experience

- 5+ Years' experience working with Microsoft Windows and SQL Server
- Strong experience in ETL capabilities
- SQL Server Management Studio, SSIS, and SSRS experience
- Strong Analytics and Business Technical Problem-Solving Skills
- Excellent Business Communication and Writing Skills.
- Experience working with Project Management Tools, AGILE, and MS Team Foundation

Compensation range for this position is based on experience. This is a local position and local candidates are preferred.

Job Type: Full-time
